## M O L B A

Molim naslov da mi odobri odlazak na specijalizaciju na  
Department of Medicine, Indiana University School of Medicine,  
Indianapolis, Indiana, USA u trajanju od godine dana počevši od  
15. srpnja 1992. Specijalizacija će obuhvatiti područje  
molekularne biologije i fiziologije kardiovaskularnog sustava  
(konstrukcija, genetička i fiziološka analiza transgeničnih  
miševa koji nose gen za atrijski natriuretski faktor i renin).

Dr. Zoran Tadic'

Dear Zoran;

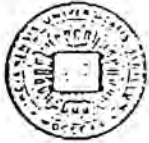

I am writing to formally invite you to join my laboratory at the Krannert Institute of Cardiology, Indiana University School of Medicine. I have initiated the official paper work at this end, and a formal contract should be mailed to you within 30 days (a copy of the letter sent to the Chair of Medicine regarding your appointment is enclosed). I have set your salary at \$19,700/year, which is the standard NIH salary for first year postdoctorals. Additionally, I anticipate that you will most likely be able to secure independent funds for your salary; this would most likely be accomplished through the American Heart Association or other similar program. However, we will have to assess your eligibility for the various programs prior to application. We will wait until your arrival to initiate this process.

In closing, I look forward to your arrival, and to a fruitful interaction over the next several years. Please call if there are any questions.

Sincerely,

D. Craig Brater, MD  
 Chairman, Department of Medicine  
 Emerson Hall, Rm. 317  
 IUPUI

Dear Dr. Brater,

Dr. Zoran Tadic' will be joining my laboratory at the Kran-  
 nert Institute as a postdoctoral on or about June 1, 1992. Dr.  
 Tadic' recieved his PhD in Physiology from the University of  
 Zagreb, Yugoslavia. His thesis involved analysis of the trans-  
 forming potential of the normal and mutated hepatitis B virus X  
 gene. Additionally, Dr. Tadic' spent eight months as a predoc-  
 toral trainee at the MaxPlanck Institute in Munich, where he  
 obtained training in molecular techniques.

Dr. Tadic's research in Indiana will center on the analysis  
 and characterization of ANF expression in various transgenic  
 animal models generated in our laboratory over the past several  
 years. Additionally, Dr. Tadic' is interested in the possibility  
 of generating transgenic animals which are deficient in ANF  
 production. I anticipate that Dr. Tadic' will be in the lab for  
 approximately two to three years. He will have no clinical  
 responsibilities during his stay at IU.

Dr. Tadic' will be hired as a postdoctoral assistant at Rank  
 Code IR98. Given that this is his first postdoctoral experience,  
 Dr. Tadic's initial salary will be \$19,700, and the funds for his  
 salary will come from account #46-826-98. Additionally, I  
 anticipate that Dr. Tadic' will apply for extramural support in  
 the form of a Postdoctoral Fellowship.

Thank you for your assistance.

With best wishes,

Michael J. Field  
 Associate Professor
