Za razliku od područja kognicije, područje razvoja ponašanja životinja danas se vrlo malo proučava kao zasebno područje, pa istraživačkih skupina koje se bave isključivo tim područjem više nema. Uglavnom se razvojem ponašanja tijekom života životinja sada bave skupine čiji je primarni interes bihevioralna endokrinologija i/ili neuroetologija. Međutim, to je područje istraživanja bilo jako aktivno tijekom 70-tih i 80-tih godina 20-tog stoljeća.
